DETAILED ACTION

This Office Action is in response to the Amendment filed on November 15, 2005. Claims 1-3 and 5 were amended, claims 4 and 6-8 were deleted, and claim 9 was added.

EXAMINER'S AMENDMENT

The application has been amended as follows:

- In claim 1, line 12, "***and***" before "***a second diesel particulate filter***" has been deleted.
- In claim 1, lines 15-16, "***and***" has been added before "***said second passage***".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose the claimed combination of an internal combustion engine having dual EGR systems including:

" Regarding claim 1:

the second passage being branched out on an upstream side of the first diesel particulate filter, a second particulate filter being arranged in said second EGR passage, and said second EGR passage having an inlet disposed on the side of the upstream first diesel particulate filter.

Regarding claims 3 and 5:

a second particulate filter being arranged in said second EGR passage, and said second EGR passage having an inlet disposed on the side of the upstream first diesel particulate filter."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Liu et al. (US Patent Number 6,973,786 B1) disclose emission reduction in a diesel engine by selective use of high-and-low pressure EGR loops.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
